Sprint 1 Review

03/09/2020 – 03/14/2020

Team:
Chandan Yadav
Nachiappan Lakshmanan
Ashutosh Dey
Srinivasan Sundar
Ashwin Srinivasan

- The objective of this Sprint was to compile and validate the arrangement of the given shapes on the left panel when connected in a specific pattern.

- Each of the shape on the left panel signified the opening and closing of the conditional statements, loops and assignment operators.

- The arrangements on the right panel represents a function block with the different components attached together to form a complete structure of a function block.

- As opposed to the last project, the above-mentioned functionality is supposed to be replicated on different tabs and has been accomplished.

- All the user stories that were estimated have been completed on time.

- The user stories have been tested and all the bugs and issues that were identified have been resolved.
